

SANSKAR CHANDAK

Pune, India ♦ [linkedin.com/in/sanskarchandak](https://www.linkedin.com/in/sanskarchandak)

SUMMARY

QA Engineer with over 4+ years of experience in functional, manual, and API testing across financial systems, including audit platforms and order management systems. Experienced in validating transaction workflows, data integrity, and end-to-end business processes within control-driven environments. Strong exposure to functional specification analysis, Agile delivery models, test case design, defect management, and cross-functional collaboration. Working knowledge of automation using Java, Selenium, and REST-based validation, with foundational knowledge of payment domain standards, including SWIFT and ISO 20022.

SKILLS

Functional Testing, Manual Testing, Integration Testing, Regression Testing, API Testing, SIT, UAT, Functional Specification Analysis, Requirement Analysis, Test Case Design, Test Execution, Defect Lifecycle Management, STLC, SDLC, SQL, Backend Data Validation, Selenium WebDriver, XPath, Synchronization (Explicit Waits, WebDriverWait), Core Java, Object-Oriented Programming (OOP), TestNG, JUnit, Maven, Page Object Model (POM), REST Assured, Postman, Swagger, JSON/XML Validation, Cucumber (Basic Knowledge), Git, JIRA, Confluence, Azure DevOps, Jenkins (CI/CD), AWS (Basic Knowledge), Agile/Scrum, Sprint Planning, Backlog Refinement.

EXPERIENCE

Associate - Cognizant Technology Services

Oct 2022 - Present

Promoted twice: Programmer Analyst Trainee → Programmer Analyst → Associate

Pune, India

Client - Ernst & Young Private Limited

Nov 2024 - Present

- Performed functional and manual testing for a financial audit platform, validating audit workflows, financial controls, and end-to-end business processes.
- Conducted functional specification analysis by reviewing business requirements, engaging with Business Analysts and developers to identify functional gaps and ensure compliance with audit standards.
- Developed test strategies and executed test scenarios across the STLC, covering test planning, execution, defect tracking, and reporting.
- Performed API testing using Postman and Swagger, validating request/response accuracy and service integration.
- Conducted SQL-based backend validation to verify data consistency across application screens, reports, and financial records.
- Maintained test documentation and defect status using JIRA, Confluence, and SharePoint, ensuring traceability across sprint cycles.
- Actively participated in Agile ceremonies including sprint planning, backlog refinement, daily stand-ups, and requirement discussions.
- Identified, documented, and tracked critical defects impacting workflow integrity, reporting accuracy, and regulatory compliance.
- Collaborated with cross-functional IT and business teams to support defect resolution, improve functional alignment, and ensure successful release delivery.

Client - Mattel, Inc.

Oct 2022 - Oct 2024

- Validated end-to-end order management workflows across OMS, WMS, and CRM systems ensuring accurate order processing, fulfillment, and shipment tracking.
- Performed cross-system data validation across order, inventory, and shipment modules to ensure transactional consistency.
- Designed and executed test cases within Agile sprints, ensuring coverage of functional and integration scenarios.
- Collaborated with cross-functional teams to resolve defects and ensure timely delivery of releases.
- Participated in sprint ceremonies and coordinated testing activities to support release objectives.
- Validated complex business workflows involving order lifecycle, inventory updates, and shipment tracking.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science, Acropolis Institute of Technology - Affiliated to RGPV, Bhopal

2019 - 2022

Diploma in Computer Science, MJP Govt. Polytechnic College - Affiliated to RGPV, Bhopal

2016 - 2019
